Ser. No.: 09/917,324 Atty. Docket No.: 101916-200

Art Unit: 2876

IN THE CLAIMS

A presentation of all of the pending Claims with their current status indicated follows.

1. (Currently Amended) A method for performing an electronic card enabled

transaction in a point of sale (POS) system having a self-service facility electronically

connected to a card authorization center via a public network, the self-service facility including

a card transaction terminal, the method comprising the acts of:

(a) requesting an approval-before-the-transaction (ABCT) of the authorization center

for setting a virtual transaction amount (VTA) at the self service facility;

(b) determining whether the transaction is valid or not by validating the card and a

corresponding account at the authorization center;

(c) approving the VTA if [it has been determined] a determination has been made that

the card and account are valid and responsively sending an approval signal to the self-service

facility;

(d) executing the transaction at the self-service facility on the basis of the approval

signal if the VTA is approved;

(e) requesting an approval-after-the-card-transaction (AACT) of the authorization

center for setting an actual transaction amount (ATA) on the basis of the actual executed

transaction;

(f) revalidating the VTA into the ATA at the authorization center and sending a

confirmation signal to the self-service facility; and

(g) initializing the self-service facility for a next transaction and issuing a receipt for the

actual executed transaction.

2. (Currently Amended) The method of claim 1 wherein the VTA is a maximum

anticipated transaction amount which [ean-be] is set for a particular one-time transaction.

2

Ser. No.: 09/917,324 Atty. Docket No.: 101916-200

Art Unit: 2876

3. (Original) The method of claim 2 wherein the maximum anticipated transaction

amount is determined by attributes of an item or service to be provided in the transaction.

4. (Currently Amended) The method of claim 3 wherein the item or service is one for

which a payment amount [can not be] is not determined before the actual transaction is

executed.

5. (Original) The method of claim 3 wherein the attributes comprise at least one of: a

physical amount of the item; availability of the item or service; and a service time.

6. (Original) The method of claim 1 further comprising, before said act (a), the acts of:

reading the card in the card transaction terminal of the self-service facility; and

identifying a user using a entered personal identification number.

7. (Currently Amended) The method of claim 1 further comprising the acts of:

denying the VTA if [it has been determined] a determination is made that one of the

card and account are invalid; and

responsively sending an approval failure signal to the self-service facility.

8. (Original) The method of claim 1 further comprising canceling the ABCT for the

VTA after one of act (a), (b), and (c).

9. (Original) The method of claim 1 wherein the ATA is prevented from exceeding the

VTA.

Art Unit: 2876

10. (Currently Amended) A method for performing an electronic card enabled

transaction in a point of sale (POS) system having a self-service facility electronically

connected to a card authorization center via a public network, the self-service facility including

a card transaction terminal, the method comprising the acts of:

(a) requesting an approval-before-the-transaction (ABCT) of the authorization center

for setting a virtual transaction amount (VTA) at the self-service facility;

(b) validating the card and a corresponding account at the authorization center;

(c) approving the VTA if [it has been determined] a determination is made that the card

and account are valid and responsively sending an approval signal to the self-service facility,

the approved VTA being the lesser of: (1) a target VTA related to anticipated parameters of the

transaction; and (2) a value related to an available amount in said account;

(d) executing the transaction at the self-service facility on the basis of the approval

signal if the VTA is approved and including restricting such execution to prevent an actual

transaction amount (ATA) from exceeding the approved VTA;

(e) requesting an approval-after-the-card-transaction (AACT) of the authorization

center for charging or debiting the account in the amount of the ATA on the basis of the actual

executed transaction; and

(f) initializing the self-service facility for a next transaction and issuing a receipt for the

actual executed transaction.
